BOYS WILL BE GOOD. Guy Ross and Leslie Grant, the two boys arrested by Officers Sperry and Davies for incorrigibility, were taken before Judge Diehl this morning for trial but the authorities decided to give them another chance. The boys tearfully promised to be good in the future, to mind their parents, to go to school every day and keep off the streets after dark. Assistant County Attorney Loofbourow promised to do all he could to send them to the State Industrial school if there were any more com-plaints against them.

tific books. Sale opens Saturday morning at 10 a. m. Every lady attending the sale on Monday afternoon will receive a handsomely bound book as a souvenir free: S. A. THOMAS, Manager.

QUERIES COMING FROM ALL PARTS

Agent at Blackfoot Gets Heavy Mail on Thunder Mountain.

GETTING READY FOR RUSH.

Supt. Olmstead Says Daily Trains Will Re Run on Salmon River Branch Next Spring.

Superintendent C. H. Olmstead of the Montana division of the Oregon Short Line, is in the city today, in attendance on court. He speaks in high terms of the new Salmon River branch which has just been added to his jurisdiction, and says that while trains are now running only three times a week on this line, daily trains will be run in the spring. Mr. Olmstead looks for a heavy traffic, both freight and passenger, next spring, and says that people are even now going into the Thunder Mountain district with the winter before them, and that the agent at Blackfoot receives on the average of five letters a day of inquiry from the eas as to the mining prospects. People do not know who to write to, so they get folder with a map, and finding Blackfoot is the Junction, write to the agent for information. Mr. Olmstead says there is a new station building going up at Arco which will be a credit to the company. The business on the Montana line is better than ever before, both freight and passenger. Winter, Mr. Olmstead says, is beginning up north, as he left several inches of snow on the ground over the Montana divi-sion; but it was raining at Pocatello this morning.

NO SURVEYS AS YET.

General Manager W. H. Bancroft said this morning that he considered the New Salmon River branch a very promising piece of property, and be-lieved that it would handle a large amount of business. As to the exten-sion of the line into the Thunder Mountain country, he said that was a matter which could not be decided until spring, as no surveys had as yet been run in

J. M. HERBERT ARRIVES.

General Manager of Rio Grande Western Inspecting the System. Manager J. M. Herbert of the Rio

Grande system, arrived last evening in this city from his inspection of the various lines and branches of this already extensive system, and today is looking over the shops and various valuable local properties of the Western. With a trip to Bingham and Og-den, the work of review will be completed, and the new manager will return to Denver with a comprehensive and intelligent knowledge of the conditions obtaining over one of the most valuable and best managed railway

properties of the country.

Manager Herbert is much gratified with the result of his observations, and finds in General Superintendent Welby of the Western, a man who has a splendid mastery of detail and has kept the physical condition of his line in the highest possible efficiency. It is believed that the chances for Mr. believed that the chances for Mr. Welby's being advanced to the vacant position of the general superintendency of the Rio Grande system are promising. Manager Herbert has made up his mind to do one thing, and that is to reduce further the grades and curvatures of the road, and states that the grades between this city and Tucker will be reduced to not over eight tenths per cent. This will require something of a financial outlay, but the result will be worth the money in the shortening of time andless consumption of fuel. The work will begin in the spring, Manager Herbert says, as soon as the weather permits. He does not contemplate any change in the personnel of the employes of the Western. Only four years ago Mr. Herbert was a dispatcher on the Wabash, but his genius for railroad work has led to his rapid advancement, and now he has in his hands the control of one of the noted railway systems of the country. Mr. Herbert has a frank open manner, and inspires one with confidence in him at once. matter of new shops in this city will receive careful consideration, and the necessity of a new depot is manifest to

Passes to Be Trimmed.

Commercial Freight Agent M. J. Allen of the Baltimore & Ohio in Denver was in town today looking after the interests of his road. He says railroad men in Denver expect that pass system will be materially tricted the coming year; that a large and interesting aggregation of travel-ing freight and passenger agents will be permanently severed from their annual receipt of free transportation. The result will be an extended pruning of this class of agencies if not a practical abolition of this particular branch of railroad work. Mr. Allen says that one particular reason for this belief is that the eastern passenger men have not sent out this winter as usual their requests for western transportation, and there is no intimation whatever that any eastern transportation will be sent west. While the action recently of the eastern passenger association in formally swearing off on issuing passes does not bind the operating departments or the managers of the roads epresented by these passenger agents, still, Mr. Allen thinks the action of the latter will be largely influential in bringing about a similar condition of things in other departments which issue passes also.

Heavy Locomot've Orders.

The ordering of locomotives continues to be the special order of the day in the mechanical departments of American roads, and the growth of traffic is such that there is no telling when the de-mand will subside. The following roads ave in the past week been ordering as ollows, Norfolk & Western ten engines from the American Locomotive company: Lehigh Valley, ten engines from the Baldwin works; C. B. & Q., twenty-five freight engines of the prairie type from the Baldwins. from the Baldwins; St. Clair Steel com pany, four six wheeled engine from American company: Santa Fe read, 120 engines from the Baldwins: Lake Shore Michigan southern, twenty-five switching engines; Pennsylvania Railroad, 200 engines from the Baldwins; New York Central twenty engines from Schenectady works and fifteen from the Cooke works; Detroit & Mackinac road, two ten wheel engines: total of 431 engines. At this rate, it is safe to say that the total shops of this country are turning out locomotives at sued. Just the souvenir to send to

the rate of 6,000 per year. Proposed Canadian Transfer. Halifax, N. S., Dec. 5 .- The Halifax pard of trade today passed a resolu tion favoring the transfer of the man-agement of the Inter-colonial Railway to the Canadian Pacific Railway.

tend greatly to stimulate traffic in Hali-

Copies of the resolution will be sent to the several boards of trade through the Dominion, and they will be asked to unite in a memorial to the Federal govnment favoring the transfer of the

The board also passed a resolution in favor of the Dominion govern-ment establishing a fast steamship serice with Halifax as the terminal on this side of the Atlantic, the service to equal any running out of New York.

Engines for Heavy Grades. At a recent meeting of the New York

railroad club, the development of the modern locomotive in the matter of size was discussed. Among the instance cited was the consolidation locomotive in service on the Colorado Midland This is an unusual type for passenge service, but the grades demand the u most limits of tractive power. The engines are intended to operate on 3 and per cent grades and over curves of degrees. They are four cylinders con pounds, 17 and 28 inches in diameter and 26 inches stroke. The drivers are 6 inches in diameter and operate with a novel style of bruke. When descending grades the reverse lever is set in the back motion and the cylinders used a air pumps. Braking with this device ha even so efficient that it is possible passenger trains down the des without applying the car brake Railroad men say that the value of th feature as a means of avoiding heating wheels and brakeshoes is at once apparent. Another engine of the consolida tion class in construction is a compoundecaped with cylinders is and 32 inches in diameter and 32 inches stroke. It will weigh 260,000 pounds, without the tender, and have 5,800 square feet of at 7 p. m. heating surface. The weight on the drivers will be 230,000 pounds.

SPIKE AND RAIL.

The Burlington office has received a consignment of calendars for 1902; also folders containing the winter time cards. There is always a great call for Burlington calendars.

in the morning from Chicago, where he went with the Idaho delegation, which the Milwaukee carried into Chicago from Omaha. Part of the Utah delegation also went by the same route. W. H. Bisspand, chief clerk in the passenger department of the Missouri Pa-cific, and A. V. Bingham, traveling pa-senger agent for the Iron Mountain road are in the city from St. Louis on

a little pleasure trip to see the western country. Attorney General Comstock of North Dakota says his state can do nothing to prevent the tripartite railway consolida-tion intended by James J. Hill, and the Northern Securities company will manage the Northern Pacific, Great North-

ern and Burlington systems as pro Telephones are beginning to supplant the telegraph to such an extent in railroad work, especially in suburban train dispatching, as to attract growing interest and attention in the east. In Boston 00 suburban trains are moved daily by telephone. The offices, switch yards, various works, blockhouses, etc., are all connected by telephonic communication. The Boston & Maine, the New York, New Haven & Hartford, the Pennsylvania, Illinois Central and numerous

other railroads use the system. The presidents of the railway systems of this country and the traffic men will meet together in Chicago on the 20th inst., and if reports from the east are to be credited, a strong effort will be made to stop the rate cutting fever, from which the Harriman and the Gould roads are suffering. The Chicago papers report that rates from Chicago to Colorado and Utah are demoralized. and Atlantic seaboard rates are said to are growling, and the financial man-agements of the roads involved want the racket stopped.
